

AI Readiness Assessment

This artificial intelligence (AI) readiness assessment enables business leaders to evaluate their organization's AI readiness by pinpointing critical gaps across strategy, leadership, and technology.

By completing the questions below, you'll gain a strategic view of your organization's AI readiness and uncover the critical steps needed to drive meaningful transformation.

Vision & Strategy

Does your organization have a clear vision for how AI can drive growth and innovation?

Leadership & Culture

Is your leadership team knowledgeable about AI's potential and prepared to champion its adoption?

Data Infrastructure

Does your organization have a well-organized, high-quality data infrastructure that can support AI initiatives?

Technology & Tools

Do you have access to the necessary tools, platforms, and software for AI implementation?

Talent & Skills

Does your organization have in-house AI expertise or access to AI specialists?

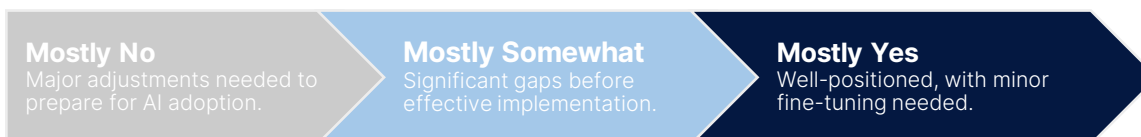

Ethical Considerations

Have you established guidelines or frameworks for ethical AI usage, including bias and transparency?

Scoring Overview

Your AI Journey

Based on your assessment score, now is the moment to address any gaps and unlock the full potential of AI to drive impactful outcomes for your business. We encourage you to use the insights from this AI readiness assessment to identify potential growth opportunities for your business. [Schedule a call to learn more.](#)
